

Control Panels

Control panels are available in a number of configurations to meet the requirements of the applications.

Shown here is a simple control panel that makes use of relay logic to control a pair of pumps. Control panels are manufactured to UL508 requirements.

Typical front panel with alarm lights, “Hand-off-auto” switches for two pumps and a lead pump selector switch.

Inside view of the control panel showing the circuit breakers, motion starters, and relays along with field terminations.
